The Solar System

The Sun and the space objects that move around it make up our solar system. There are nine planets in our solar system. A planet is a large object that moves around the Sun. Planets are always in the sky. Many planets have moons. Earth is a planet with one moon.

**MAIN IDEA** What makes up the solar system?

Vocabulary

**planet**

Reading Skill

How do living things use the Sun’s energy?

Predict

What might happen to a plant if it did not get enough light from the Sun? Tell why.

Technology

Visit www.eduplace.com/scp/ to find out more about the Sun.
